ABOUT

A small, senior team that works as an extension of yours

DiS Interiors is a 3D visualisation studio. Your team does the design, drawings and measurements; we turn them into photoreal stills for planning, marketing and client sign-off.

Most of our work is overflow and white-label: studios send us plans, elevations or a model, and we return images in their style and under their name. Nothing in this portfolio names the studios or end clients we worked for.

The images in this document are our own work. Selected projects are also public on Behance: behance.net/disinterior

WHAT WE DO

- Interior stills: hotels, restaurants, offices, homes
- Exterior stills and aerial views for residential schemes
- Kitchen, bedroom and furniture product scenes

WORKING TOGETHER

How a project runs

PROCESS

1. You send plans, elevations or a model, with references and the views you need.
2. We confirm the scope, price and delivery date in a written quote.
3. We send draft views for camera and composition approval.
4. We send near-final images for materials and lighting comments.
5. We deliver final high-resolution images, unbranded, ready for your use.

> **Free test image**
>
> For a new studio, we produce one image from a real project of yours at no cost, so you can judge quality, communication and speed before you commit.
